PROJECT EXPERIENCE

Word-A-Day App

- Word-A-Day was created to help people expand their vocabulary by learning a new word every day! This application is different from traditional "word of the day" apps because we integrated flashcards and self-testing features to make sure the user is actually learning the word- not just reading it!
- This project was developed using Spring Boot, Java, and MySQL.
- https://github.com/cgeffre/wordaday (Project Repository)

To Do List App — HTML/CSS/JAVASCRIPT

- Designed visually appealing basic ToDo List website
- Utilized local storage, DOM, Event Listeners
- https://github.com/BorntobeStarr/Todo-List-Project

WORK EXPERIENCE

Teaching Assistant and Virtual Learning Co-Coordinator, Universal Companies (Daroff),
Philadelphia, January 2020 – December 2021

- Formulated a hybrid plan and fully virtual learning to comply with needs of scholars
- Created tutorials for teachers to use to assist with virtual learning
- Setup and maintain Google Classroom for teachers.
- Collaborate with teachers with lesson planning and equipment setup
- Created and taught an HTML/CSS class for the school's summer program.

Administrative Assistant, Wells Fargo, Philadelphia, August 2019 – December 2019

- In charge of various calendars, scheduled appointments, and various office tasks
- Used software such as Outlook, Microsoft Word, PowerPoint, and Excel.
- Edited small grammar errors and did meticulous data entry
- Used effective communication to complete the project.
- Worked with multiple teams within the international banking department
